Irving Ratchick

FOREWORD

New York State has gained immeasurably from funds allotted to it under the Elementary and Secondary Education Act of 1965. The major thrust of the Act contained in Title I provided financial assistance to local educational agencies for the education of children of low-income families.

The ultimate purpose of the legislation is to break the "chain of poverty" and to alleviate the poverty syndrome of poor educational achievement, negative self-image, limited aspirations and numerous other conditions exhibited by disadvantaged children. Through special educational programming for deprived children, it is anticipated that renewed interest in learning will raise the goals of the disadvantaged and benefit society.

Local educational agencies were able to expand, initiate and improve programs for the educationally disadvantaged children attending public and non-public schools through the use of resources provided by Title I, ESEA. This publication is supplied to you for your information and use in future educational planning.

The capsule summaries of programs instituted by local educational agencies during the 1965-66 school year, represents much thought in planning by school administrators, their staff and appropriate community resources.

Much credit is due to the legislators representing New York State in Congress who by virtue of their understanding and insight helped bring about the passage of the Act.

The publication was prepared under the leadership of John House, Associate Coordinator, Title I, ESEA with the assistance of a number of

consultants. The overall responsibility for this publication and other activities related to Title I, ESEA is under the direction of Dr. Irving Ratchick, Coordinator, Title I, ESEA.

Additional copies will be supplied upon request.

Walter Crewson

WALTER CREWSON

**Associate Commissioner for
Elementary, Secondary and
Continuing Education**

INTRODUCTION

This publication broadly details the programmed expenditure of \$109,284,046.65 of Fiscal Year 1966 Title I, ESEA federal funds in New York State. These funds are identified as categorical aid, since they must be used for special educational programs for selected disadvantaged children and youth.

As this publication is reviewed it will be obvious that a wide variety of compensatory education programs was designed and implemented in the local education agencies to meet the needs of the educationally disadvantaged and that these eligible pupils were offered new and expanded educational experiences.

At present, the evidence is not as yet conclusive as to the influence these programs have had upon the pupil participants. However, if ingenuity, effort, energy and money are reliable barometers of inherent quality, the results will be positive.

In New York State the eligible agency for Title I funding is the local educational agency. At the discretion of the local school district administrators, program applications may be prepared and submitted to the New York State Education Department for approval in a combination of ways:

1. Administrators may submit a program designed to be implemented and administered by the local school district only.
2. Administrators may plan a program in cooperation with another school district. One of the school districts concerned is designated as the administering agency and is responsible for implementation, fiscal management and evaluation of the project. Programs of this nature are identified in this publication with the letter (J) for Joint program.

3. A board of education may petition, by resolution, a Board of Cooperative Educational Services (BOCES) to design and/or administer a program for it. Two or more school districts must petition the BOCES before it can accept the petition. The program to be offered should be equitably programmed in the school districts concerned. Programs of this nature are identified as (BJ), BOCES, Joint.

4. In some instances common school districts exist which do not offer complete educational programs, grades K-12. Children residing in the district are educated in neighboring established operating school districts through contract with the receiving district. The letter (C) designates the receiving school district responsible for administering the program. The contracting (common) districts are listed below the receiving district.

The total amount of federal funds indicated to support any one particular project represents an approximation of cost. Since the final financial reports from school districts have not been thoroughly audited, it is impossible to determine the exact cost of a project. Final auditing may show minor differences due to the inability of the school districts to hire sufficient staff, to enter into program contracts, to purchase desired equipment and materials or to completely fulfill all of their program intentions as originally indicated in the program applications.

Additional information concerning the programs depicted in this publication may be gained by writing to the chief school administrator of the school district concerned.

PUBLIC LAW 89-313

An amendment to the Elementary and Secondary Education Act of 1965 designated as Public Law 89-313 includes the provision for grants to State agencies which are directly responsible for providing, on a non-school district basis free public education for handicapped children (including mentally handicapped, retarded, hard of hearing, deaf and speech impaired, physically handicapped, seriously emotionally disturbed, crippled or other health impaired children) who by reason thereof require special education.

In New York State, these grants were made available for fiscal year 1966 to the State Education Department for its State operated schools for deaf children at Rome and blind children at Batavia and twelve State supported schools which provide services for handicapped children. Other State agencies which received grants included the Department of Mental Hygiene, Department of Health and the Division for Youth. The procedures of processing applications and approval of programs and services for State agencies are coordinated through the Office of the Coordinator, Title I, ESEA.

The following list of projects were approved for the State agencies covered under P.L. 89-313.

Schools Operated or Supported by State Agencies*
(P.L. 89-313)
